

# Kankakee County Health Department Annual Report 2009

---

To the Citizens of Kankakee County

The Kankakee County Health Department believes it is the right of all citizens to have access to a broad continuum of community-based services that protect, maintain and promote the bio-psycho-social health and well being of the community, and provide a safe and healthy environment. We are pleased to present this report which summarizes those services provided during the past year, as well as a summary of the occurrence of specific reportable communicable diseases.

In the year ahead, the Health Department will continue our efforts to prevent the spread of disease, ensure the safety of food and water, promote the health of children and adults, and protect the natural environment. In order to accomplish our mission, we will continue to work together with other community health professionals, health care facilities, schools, local and state officials and our citizens. The necessity of community cooperation was perhaps best evidenced this year as we worked together to deal with the H1N1 influenza outbreak which affected the whole nation. Here in Kankakee County we spearheaded the effort to educate the public about preventative measures, and instituted a mass vaccination campaign in schools and throughout the community to provide protection to the public. It is only through the combined efforts of us all that we can realize our public health goals protect the health of our citizens.

The Board of Health and the Kankakee County Health Department and its employees are proud to be able to serve you and to work together to promote **Healthy People in Healthy Communities.**

Bonnie Schaafsma, RN, BSN, MBA  
Public Health Administrator

*The Kankakee County Health Department believes that it is the right of all citizens to have access to a broad continuum of community-based services that protect, maintain and promote the bio-psycho-social health and well-being of the community, and provide a safe and healthy environment. The department continually assesses the health needs and resources available, promotes development of appropriate needed programs and assures that quality services are acceptable, available, accessible and accountable. These services are delivered in a manner that respects individual/community dignity, values and rights as well as standards established on the federal, state and local levels.*
